

TecDoc Global Catalogue Help file

Content

In the process of using, do you encounter the following problems?

- 1. Some vehicles can't be searched?
- 2. Why is the year of some searched vehicles relatively old?
- 3. How to export vehicle data information?
- 4. How to find the relevant vehicles by searching the OE number?
- 5. How to directly view all the information of one product line?

For above problems, you can continue to view this document to help you solve the problem.

If you have any other questions, please feel free to contact us!

Q1. Some vehicles can't be searched?

A: When using the global catalog, you need to set the vehicle country so that you can search for vehicles in different countries.

Setting method: Select "My Account" → "Vehicle and article search" to change the country of the vehicle

Q2. Why is the year of some searched vehicles relatively old?

- A: There have two reasons:
- (1) The parts brand may have developed new parts for the new vehicle; This part is only suitable for old vehicle
- **(2)** The parts brand has not updated the vehicle linkages timely

Q3. How to export vehicle data information?

A: Parts and vehicles information in the global catalog can be exported and printed.

Setting method:

1. On parts detail page, click the print icon 📥 in the upper

right corner to download the PDF or print the relevant parts and

vehicles information.

2. Search by vehicle, and click the print icon here in the "vehicle details"

column to download or print the information of the vehicle.

Q4. How to find the relevant vehicles by searching the OE number?

A: Search the OE number directly in the global catalog to find related parts. After selecting the parts, you can view the related vehicle and the corresponding OE information.

The catalogue data is submitted by brands, and there is no direct correspondence between OE and vehicle.

If you need the relationship between OE number and vehicle, you can contact TecAlliance for customized data services.

Q5. How to directly view all the information of one product line?

A: On the homepage of the catalog, you can directly view the product line through the following two locations.

- The products that can be viewed are divided into "Universal article" (for example: antennas, gaskets, etc.), and there is no vehicle link; for "non-universal article" (for example: brake discs, filters, etc.), there will be a manufacturer's own maintenance vehicle link.
 - 1. Universal article : At the bottom of the homepage, you can directly select the product line to view, and you can mark the product lines that are frequently viewed, so as to facilitate each review.
 - 2. Non-universal article: At "Search by brands and product groups", click on the product group and directly select the product line you want to view.
